### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, Examiner concurs with Applicant arguments (See Remarks, 9/16/05).

Regarding claims 31 and 33, the steps of adding to the mixture a particulate media with a conductive additive, or a ferromagnetic additive incorporated into the polymeric material, for selectively mediating a triboelectric charging and separating two or more components of the mixture according to a triboelectric charge of the polymeric components render the invention novel and non-obvious over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
